

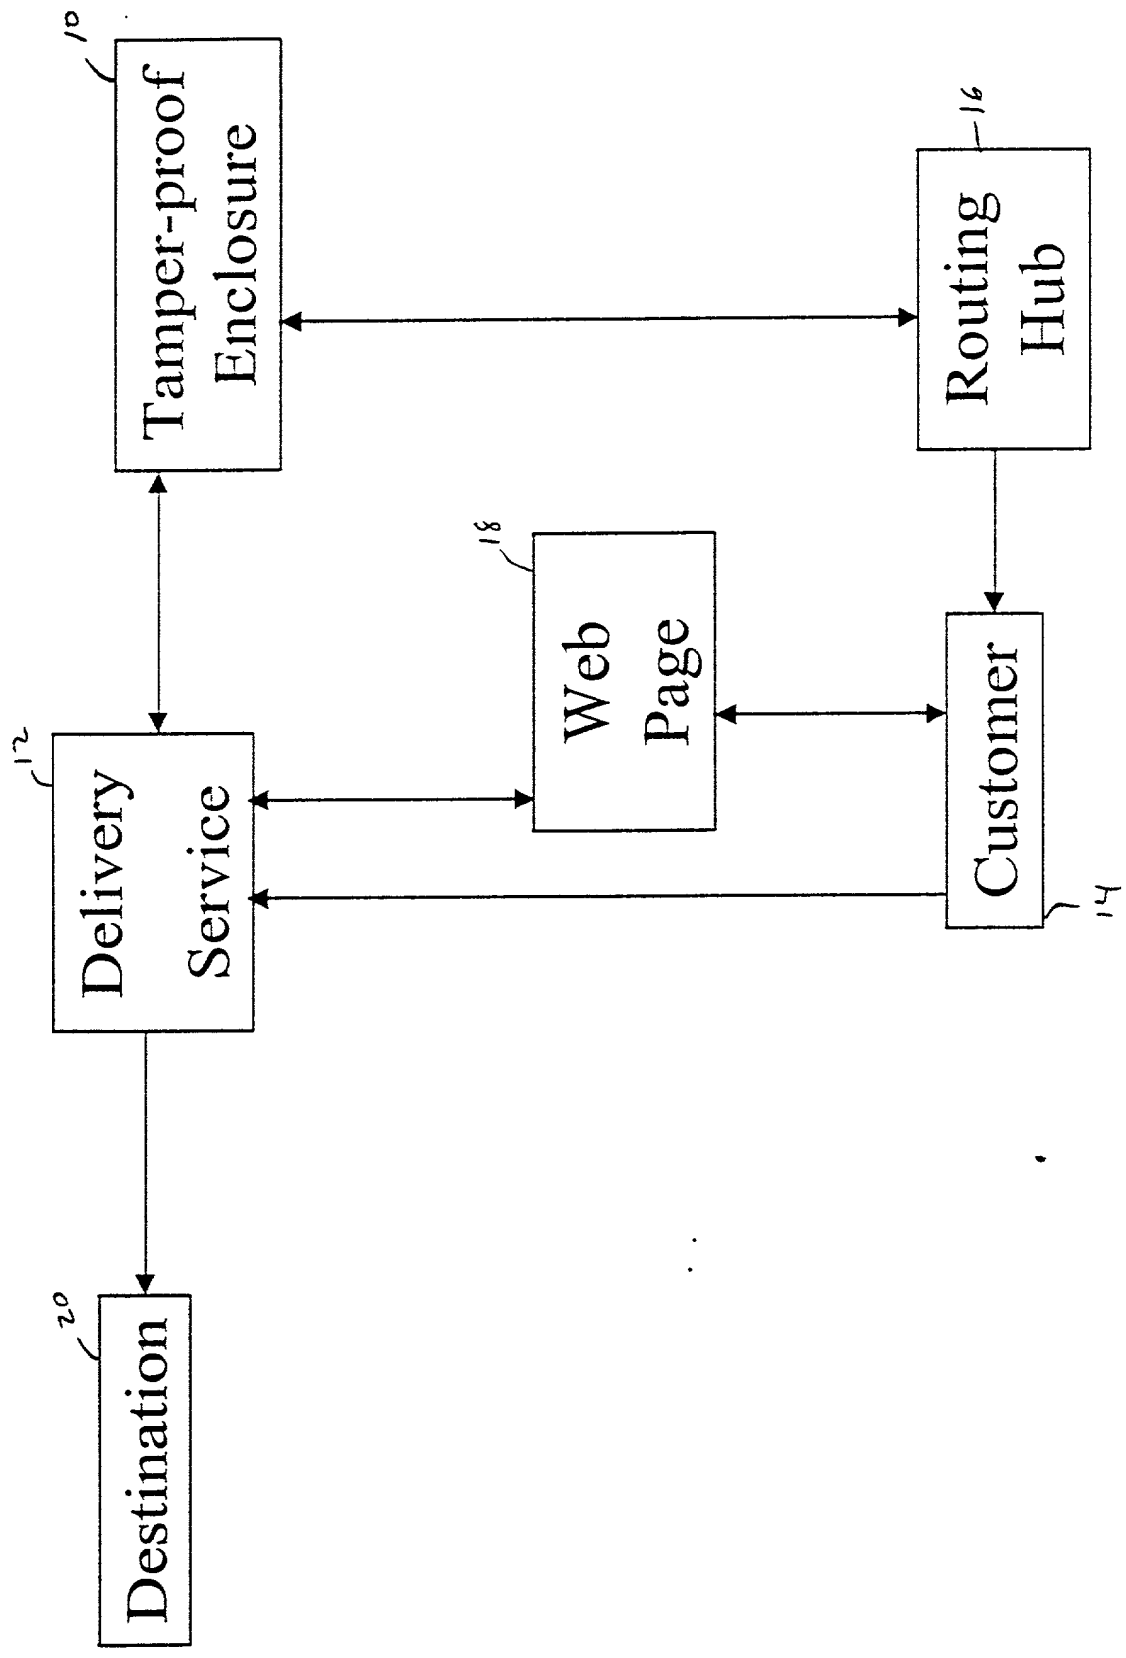

Figure 2 is a block diagram of a system for delivering a tamper-proof enclosure to a destination. The system includes a destination (20), a delivery service (12), a tamper-proof enclosure (10), a routing hub (16), a customer (14), and a web page (18). The destination (20) is connected to the delivery service (12). The delivery service (12) is connected to the tamper-proof enclosure (10). The tamper-proof enclosure (10) is connected to the routing hub (16). The routing hub (16) is connected to the customer (14). The customer (14) is connected to the web page (18). The web page (18) is connected to the delivery service (12).

10.

22

FIG. 1 is a perspective view of the system of the present invention.

Year	Area	Population	Area	Population	Area	Population	Area	Population	Area	Population
1970	100	100	100	100	100	100	100	100	100	100
